WHITEFORD

Schell IP + Whiteford - Mountain West AI law

AI Authority Packet

Evidence Before Launch

Prepared for Herb / Whiteford Marketing Review

Internal marketing review draft for Whiteford/Schell IP AI authority content. Includes LinkedIn, email/newsletter, YouTube, conversion, visual, routing, and ethics guardrail recommendations.

Core thesis

AI readiness should become a launch discipline: one evidence file that connects human invention contribution, vendor/data rights, and Colorado AI governance posture before a demo becomes a product promise.

Status: internal draft only - not approved for public use, external send, or campaign activation.

Date: May 13, 2026

Packet metadata

Prepared for: Herb / Whiteford Marketing Review
Prepared by: Jeff Schell / Schell IP + Whiteford
Date: May 13, 2026
Status: Internal marketing review draft only. Do not publish, send externally, enroll contacts, or activate workflows until Whiteford review and approval.

Executive positioning

AI readiness should become a launch discipline: one evidence file that connects human invention contribution, vendor/data rights, and Colorado AI governance posture before a demo becomes a product promise.

This packet translates the Whiteford/Schell IP AI authority workstream into marketing-ready building blocks: a LinkedIn post, short email/newsletter, YouTube concept, landing-page improvement, visual direction, research anchors, routing notes, and ethics/compliance guardrails.

Content angle + executive hook

AI product launches are creating two evidence problems at once.

On the IP side, founders need a clean record of what humans actually conceived, selected, refined, tested, and reduced to a working technical solution when AI tools helped the R&D process.

On the governance side, executives need a clean record of where AI touches customers, employees, applicants, borrowers, tenants, or other consequential workflows - and which vendor, contract, data, notice, human-review, and recordkeeping controls apply.

Those should not be separate fire drills. A practical AI launch file should answer three questions before the demo becomes a product promise:

1. What human technical contribution might be protectable?
2. What AI/data/vendor terms could affect ownership, confidentiality, or use rights?
3. Does the product make, guide, or assist decisions that require governance documentation or consumer-facing process?

For Colorado and Mountain West companies, AI readiness should become a launch discipline - not late-stage legal cleanup.

Draft LinkedIn post

AI product launches are creating two evidence problems at once.

On the IP side, founders need a clean record of what humans actually conceived, selected,

refined, tested, and reduced to a working technical solution when AI tools helped the R&D process.

On the governance side, executives need a clean record of where AI touches customers, employees, applicants, borrowers, tenants, or other consequential workflows - and which vendor, contract, data, notice, human-review, and recordkeeping controls apply.

Those should not be separate fire drills.

A practical AI launch file should answer three questions before the demo becomes a product promise:

1. What human technical contribution might be protectable?
2. What AI/data/vendor terms could affect ownership, confidentiality, or use rights?
3. Does the product make, guide, or assist decisions that require governance documentation or consumer-facing process?

None of this determines patentability, inventorship, or compliance by itself. But it gives counsel and leadership the record needed to move deliberately instead of reconstructing the story during diligence, a customer security review, or a regulator question.

For Colorado and Mountain West companies, AI readiness should become a launch discipline - not late-stage legal cleanup.

Structured first pass: /ai-compliance-gameplan

Short email / newsletter

Subject: Before the AI demo becomes a legal record

Preview: A practical launch file can connect patent, vendor, and Colorado AI governance issues before they become diligence problems.

Many AI legal problems are not caused by the model itself. They are caused by missing records.

When an AI-enabled product moves from prototype to customer-facing workflow, leadership should be able to answer three questions: who made the human technical contribution, which vendor or data terms may affect rights and confidentiality, and whether the system touches consequential decisions that require governance, notice, human review, or records.

This is not a request for confidential facts in a public form, and it is not a substitute for legal advice. It is a structured way to identify where counsel should focus first.

CTA: Build the first-pass AI launch file with the AI Compliance Gameplan Builder: /ai-compliance-gameplan

@SchellIP YouTube idea

Title: The AI Launch File: What to Document Before Product, Patent, or Compliance Questions Hit

30-second hook: If your company is building with AI, the highest-value legal work may be the record you create before anyone asks for it. In this video, I'll map the three-part AI launch file: human technical contribution for patent strategy, vendor/data terms for ownership and

human contribution.

- Colorado SB25B-004: extended SB24-205 AI requirements to June 30, 2026. https://leg.colorado.gov/bills/sb25b-004
- Google Search Central: create helpful, reliable, people-first content. https://developers.google.com/search/docs/fundamentals/creating-helpful-content

HighLevel routing notes

Suggested campaign key: ai-compliance

Trigger tag: workflow:ai-compliance-readiness

Tags:

- leadmagnet:ai-compliance-gameplan
- interest:ai-compliance
- optional signal:ai-patent for R&D-heavy responses

Segment: Colorado / Mountain West founders, CEOs, COOs, CFOs, GCs, product, HR, and risk leaders preparing an AI product launch or AI-enabled workflow review.

Productized offer: AI Compliance Readiness Sprint, with cross-path to AI Patent Strategy Sprint when the launch file shows R&D/invention documentation gaps.

Unpaid / organic content strategy

Use the AI Launch Evidence File theme as a repeatable organic content lane for Whiteford/Schell IP.

Recommended unpaid content assets:

- LinkedIn thought-leadership post from Jeff: the draft post in this packet.
- LinkedIn carousel: "3 records to create before your AI demo becomes a product promise."
- Short website article: "The AI Launch Evidence File: patent, data-rights, and governance records before launch."
- One-page downloadable checklist routed to /ai-compliance-gameplan.
- Internal attorney-review version for Whiteford lawyers to share manually with approved contacts.
- Follow-up post: "Why AI governance and AI patent records should not live in separate folders."

Organic distribution sequence:

1. Publish attorney-reviewed article on the Whiteford/Schell IP site.
2. Post LinkedIn summary from Jeff with educational framing and no confidential-information invitation.
3. Repurpose into a short carousel and a 60-second video clip.
4. Share internally with Whiteford attorneys as a conversation starter for AI, technology, privacy, corporate, employment, and M&A contacts.

5. Use comments and inbound questions to identify webinar topics; do not treat engagement as consent for CRM enrollment.

Paid content strategy: Google Ads + LinkedIn Ads

Google Ads posture: capture high-intent educational searches without overclaiming legal outcomes.

Suggested search themes:

- Colorado AI compliance lawyer
- Colorado AI Act compliance counsel
- AI governance lawyer Colorado
- AI product launch legal review
- AI vendor contract legal review
- AI patent strategy lawyer
- AI policy lawyer for technology companies

Suggested landing routes:

- Primary: /ai-compliance-gameplan
- Secondary: /colorado-ai-compliance-lawyer
- Cross-path: /ai-patent-strategy-scorecard

Google Ads guardrails:

- Use "readiness," "issue spotting," "counsel-led review," and "educational checklist."
- Avoid "certify compliance," "guaranteed compliance," "patent guaranteed," or emergency-response framing.
- Add negative keywords around free legal advice, templates only, jobs, courses, and unrelated consumer AI.

LinkedIn Ads posture: target Colorado and Mountain West executives and product/legal leaders with educational assets.

Suggested LinkedIn audiences:

- Geography: Colorado, Denver, Boulder, Fort Collins, Colorado Springs, Mountain West expansion as approved.
- Functions/titles: Founder, CEO, COO, CFO, General Counsel, Product, Engineering, Risk, Compliance, HR, Privacy, Security.
- Industries: software, AI/ML, robotics, cybersecurity, aerospace/defense, data infrastructure, healthcare technology, enterprise SaaS.
- Company size: founder-led and growth-stage companies likely to need outside-GC support.

Suggested LinkedIn creative:

- Sponsored single image: "Evidence Before Launch."
- Document ad: "AI Launch Evidence File Checklist."
- Retargeting ad: "Turn your AI readiness notes into a counsel-led action plan."

YouTube strategy

Use @SchellIP to convert the authority packet into a small video series instead of a one-off post.

Recommended videos:

1. The AI Launch File: What to Document Before Product, Patent, or Compliance Questions Hit.
2. AI-assisted invention records: what founders should capture before patent strategy review.
3. Vendor/data-rights issues in AI product launches.
4. Colorado AI governance readiness: what executives should organize before counsel review.
5. Customer security reviews and AI product claims: why the evidence file matters.

Format:

- 6-10 minute main video.
- 60-second LinkedIn/YouTube Shorts cutdown.
- CTA in each video: run the AI Compliance Gameplan Builder, then consider the AI Patent Strategy Scorecard if R&D documentation is central.
- Keep all scripts educational; no legal conclusions, no confidential fact requests, no compliance/patentability guarantees.

Online event / webinar strategy

Recommended webinar title: Evidence Before Launch: AI Product, Patent, Data-Rights, and Governance Readiness for Colorado Technology Companies.

Audience:

- Colorado and Mountain West founders, executives, product leaders, GCs, privacy/security leaders, HR leaders, and investors supporting AI-enabled companies.

Proposed 45-minute agenda:

1. Why AI launch records matter before diligence, customer review, or regulator questions.
2. The three-part AI Launch Evidence File: human contribution, vendor/data rights, decision-impact governance.
3. Colorado AI timing and governance caveats, with current-law review required.
4. Practical checklist: what to collect before the first counsel conversation.
5. Q&A with no legal advice and no confidential facts requested.

Event funnel:

- Registration page with no-confidential-information warning.
- Confirmation email with the one-page checklist.
- Post-event email linking to /ai-compliance-gameplan and /ai-patent-strategy-scorecard.
- Internal Whiteford follow-up only for approved, consented contacts.

Colorado in-person event and natural-alignment strategy

Goal: align the "Evidence Before Launch" theme with existing Colorado AI and technology communities in a way that is useful, educational, and non-salesy.

Primary community targets and public contact paths:

1. Rocky Mountain AI / Rocky Mountain AI Interest Group (RMAI / RMAIIG)
   - Public site: https://www.rockymountainai.org/
   - Public contact: hello@rockymountainai.org
   - Public Meetup: https://www.meetup.com/rmaiig/
   - Key publicly listed people / subgroup paths:
     - Dan Murray - RMAIIG Founder.
     - Jason Cormier - Board President; also listed for AI Marketing Forum.
     - Andres Sepulveda-Morales - Board Treasurer; also listed for Fort Collins AI for Everyone.
     - Chris Brown - Board Secretary; listed for Legal AI.
     - Susan Adams - Women in AI subgroup contact.
     - Bill McIntyre - AI/ML Engineering subgroup contact.
     - Lauri Hofherr - AI & Product subgroup contact.
     - Bobby Hodgkinson - GenAI in Education subgroup contact.
     - Uche Ogbuji - AI for Entrepreneurs & Startups subgroup contact.
     - David Jitendranath - Denver AI subgroup contact.
     - Ken Fricklas - Ethics and Safety subgroup contact.
   - Natural alignment: offer an educational "AI Launch Evidence File" session for Legal AI, AI & Product, AI for Entrepreneurs & Startups, Ethics and Safety, or AI Marketing Forum.
2. Colorado Technology Association (CTA)
   - Public site: https://coloradotechnology.org/
   - Contact page: https://coloradotechnology.org/contact/
   - Public email: membership@coloradotechnology.org
   - Public phone listed on contact page: 303-592-4070
   - Relevant programs: Colorado Tech Summit, C-Level @ A Mile High, WIT Conference, events calendar, advocacy and member programming.
   - Natural alignment: propose a practical AI governance / product-readiness briefing for CTA members, framed around business readiness and executive records rather than legal scare tactics.
3. Boulder AI Builders
   - Public site: https://www.boulderaibuilders.org/
   - Public event path surfaced on site: Luma event signup links for Boulder/Denver meetups.
   - Natural alignment: offer a short founder/operator talk or checklist handout focused on AI launch documentation before demos, customer security reviews, or diligence.
   - Contact approach: use the site’s event signup / Luma path first, then identify current organizers from the event page before any outreach.
4. Denver-Boulder AI Tinkerers
   - Public site surfaced in search: https://denver-boulder.aitinkerers.org/
   - Public organizer path surfaced in search: https://denver-boulder.aitinkerers.org/organizers
   - Natural alignment: propose a builder-focused "what to document before shipping AI features"

webinar, and Colorado in-person community alignment through RMAIIG, CTA, Boulder AI Builders, Denver-Boulder AI Tinkerers, and Denver civic AI convenings.
